WE DO RETRIEVAL, AND IT IS LANGUAGE-INDEPENDENT (BASED ON TRAINING)

ALL OF OUR TECHNOLOGY IS HUMAN IN THE LOOP

SEEKING:

CROSS-LANGUAGE TEXT EXTRACTION

REDUCE TRAINING TIME AND EFFORT FOR EFFECTIVE TRAINING ON SMALLER SETS

IMPROVE DATA THROUGHPUT FOR MASSIVE CORPORA

ADD IMAGE, VOICE AND VIDEO DATA

"The application of AI is spreading to areas where intellect and critical thinking have long dominated. For instance, consider business research, traditionally a highly time-consuming task. **Conatix**'s semi-automated business intelligence system, based on recent advances in machine learning, enables companies to discover, source, structure and share previously unstructured data and information from outside their organizations. By working in close collaboration with researchers, the **Conatix** algorithm can adjust its course based on human feedback, creating and updating high-quality insights."

Mark Purdy (Chief Economist, Accenture) and Paul Daugherty (CTO, Accenture) in their report to F500 CEOs: <u>How AI Boosts Industry Profits and Innovation</u>
